HostGator

[starreview tpl=16]

Hosting Plans

HostGator offers three hosting plans (shared hosting). Their most popular plan is the baby plan. It offers you unlimited storage and bandwidth as well as unlimited domains on one account. In addition to shared hosting, they also offer dedicated servers and reseller hosting. They have chosen cPanel as their web hosting control panel. Many web hosts have chosen cPanel and it's no wonder since it's very user friendly and full of features.

Price

The price of the HostGator baby plan is only \$7.95/month. It's a very good price considering the amount of features included. This plan allows you to host unlimited domains on one account and offers pretty much all the features you need. This is their most popular plan. Now you can get it even cheaper by entering **coupon code "webhost-guru.com"**, which will give you the first month for just 1 cent.

Customer Service

HostGator's customer support is well organized and they offer 24/7 toll-free telephone support, live chat and ticketing system. Their web page is very well organized making it easy to find the information you are looking for.

Reliability

HostGator scores very high on reliability. They have more than 7,000 servers under management and are planning to add roughly 200 employees within the next two years to make sure they can continue to offer excellent services and maintain the reliability at the highest level.

Summary

HostGator is currently the number one in our web host ranking and we expect them to continue their strong performance also in the future. HostGator has received a number of awards for their web hosting services. WebHost-Guru highly recommends HostGator!
